Step 11
Options and tabs reduces as in the picture

Step 12
Press [Save] button

F2116 GSM/GPRS MODEM CONFIGURATION

Step 13

In Log information you can verify the operation completed successfully with « OK save success »

Step 14

Press [Quit] button to exit from DTUconfigureTool

The screenshot displays the DTUConfigureTool V1.9.2 interface. The 'Serial F' section shows 'Com' set to COM2 and 'BaudRate' set to 115200. The 'Other' section shows 'Language' set to English. The 'Log Information' window contains the following text:

```
MQTT Reporting Period: 0
MQTT Batch Report: 0
MQTT Cache Enable: 1
Clear Serial Buf: 0
Dev SN: FG7180119870
Time Zone: 8
NTP Interval: 0
NTP server: cn.ntp.org.cn
CLIENTTIMEOUT: 0
MSE TV: 0
MBRYCOUNT: 0
Device Type: F2x16V4
OK
send out AT+SERBINDCNT=0
OK
save success
send out AT+PROMODE=TRNS
OK
save success
```

The 'Configure' section on the right has tabs for 'Work Mode', 'Serial Port', 'Modbus', and 'Operation'. Under 'Protocol Setting', 'Work Mode' is set to TRNS. Under 'Debug', 'Debug Level' is set to Level 1 and 'Debug Port' is set to COM1. Under 'Other', 'Clear Serial Buffer' is set to close. At the bottom, there are buttons for 'Login', 'Quit', 'Save', 'LoadParam', 'Restore', and 'Backup'. The 'Quit' button is highlighted with an orange circle and an arrow pointing to it from the text in Step 14. The status bar at the bottom right shows 'Status: Login' and '2021/03/26 V1.9.2'.

F2116 GSM/GPRS MODEM CONFIGURATION

Step 15

Optionally move the modem serial connection from COM2 (or different one you have chosen for the procedure) to the final position, e.g. COM3

COM3 ← COM2
